At the Existentialist Café - Sarah Bakewell 2016-03-01 Named one of the Ten Best Books of 2016 by the New York Times, a spirited account of a major intellectual movement of the twentieth century and the revolutionary thinkers who came to shape it, by the best-selling author of How to Live Sarah Bakewell. Paris, 1932: three contemporaries meet over apricot cocktails at the Bec-de-Gaz bar on the rue Montparnasse. They are the young Jean-Paul Sartre, Simone de Beauvoir, and long-time friend Raymond Aron, a fellow philosopher who rueves to them about a new conceptual framework from Berlin called Phenomenology. "You see," he says, "if you are a philosopher, you can talk about this cocktail and make philosophy out of it!" It was this simple phrase that would ignite a movement, inspiring Sartre to integrate Phenomenology into his own French, humanistic sensibility, thereby creating an entirely new philosophical approach inspired by themes of radical freedom, authentic being, and political activism. This movement would sweep across the jazz clubs and cafés of the Left Bank before making its way across the world as Existentialism. Featuring not only philosophers, but also playwrights, anthropologists, counsists, and revolutionaries, At the Existentialist Café follows the existentialists’ story, from the first rebellious spark through the Second World War, to its role in postwar liberation movements such as anti-colonialism, feminism, and gay rights. Interweaving biography and philosophy, it is the epic account of passionate encuentros—love affairs, marriages, friendships, and long partnerships—and a vital investigation into what the existentialists have to offer us today, at a moment when we are once again confronting the major questions of freedom, global responsibility, and human authenticity in a fractions and technology-driven world.

We Have Only This Life to Live - Jean-Paul Sartre 2013 "Philosopher, novelist, playwright, biographer, journalist, and activist, Jean-Paul Sartre was also and perhaps above all a great essayist. The essay was uniquely suited to Sartre because of its intrinsically provisional and open-ended character. It is the perfect form in which to dramatize the existential character of our deepest intellectual, artistic, and political commitments. This new selection of Sartre's essays, the first in English to draw on the entire ten volumes of his collected essays as well as previously unpublished work, includes extraordinary searching acquisitions of such writers and artists as Faulkner, Bataille, and Giacometti; Sartre's great address to the French people at the end of the occupation, The Republic of Silence; sketches of the United States from his visit in the mid-1940s; reflections on politics that are both incisive and incendiary; portraits of Camus and Merleau-Ponty; and a candid reckoning with his own career from one of the interviews that ill-health made his prime mode of communication late in life. Together they add up to an unequaled portrait of a revolutionary and sometimes reckless thinker and writer in his contentious, difficult but stirkeful.

Horizons of Authenticity in Phenomenology, Existentialism, and Moral Psychology - Hans-Pedersen 2014-11-10 This volume centers on the exploration of the ways in which the canonical texts and thinkers of the phenomenological and existential tradition can be utilized to address contemporary, concrete philosophical issues. In particular, the included essays address the key facets of the work of Charles Guignon, and as such, honor and extend his thought and approach to philosophy. To this end, the four main sections of the volume deal with the question of authenticity, i.e. what it means to be an authentic person, the ways in which the phenomenological and existential traditions can impact the sciences, how best to understand the fact of human mortality, and, finally, the ways philosophical reflection can help address current questions of value. The volume is designed primarily to serve as a secondary resource for students and specialists interested in recontextualizing the practical application of existential and phenomenological thought. The collection of scholarly essays, then, could be used in conjunction with some of the more recent scholarship concerning the practical value of philosophy. Along with contributing to previous scholarship, the essays in this proposed volume attempt to update and expand the scope of phenomenological and existential inquiry.

Rethinking Existentialism - Jonathan Webber 2018-07-18 In Rethinking Existentialism, Jonathan Webber articulates an original interpretation of existentialism as the ethical theory that human freedom is the foundation of all other values. Offering an original analysis of classical literary and philosophical works published by Jean-Paul Sartre, Simone de Beauvoir, and Franz Fanon up until 1952, Webber’s conception of existentialism is developed in critical contrast with central works by Albert Camus, Sigmund Freud, and Maurice Merleau-Ponty. Presenting his arguments in an accessible and engaging style, Webber contends that Beauvoir and Sartre initially disagreed over the structure of human freedom in 1943 but Sartre ultimately came to accept Beauvoir’s view over the next decade. He develops the viewpoint that Beauvoir provides a more significant argument for authenticity than either Sartre or Fanon. He articulates in detail the existentialist theories of individual character and the social identities of gender and race, key concerns in current discourse. Webber concludes by sketching out the broader implications of his interpretation of existentialism for philosophy, psychology, and psychotherapy.

Choices and Conflicts - Hans van Straaten 2005 This book approaches literary existentialism (1935-1960) from a philosophical point of view and provides a semantic frame through which the primary works of this movement can be interpreted. Readings of Sartre, Sábato, Camus, Bill, De Beauvoir, Nostrodom, and others emphasize the place and themes pertinent to each writer within literary existentialism as a whole. One of the most original features of this study is its focus on the central notion of 'engagement' after 1960. Having highlighted its weakness in postmodernism, van Straaten then demonstrates the vigorous resurgence of this pivotal concept in postcolonial discourses.

Critical Essays - Roland Barthes 1972 The essays in this volume were written during the years that his author's first four books were published in France. They chart the course of Barthes's criticism from the vocabularies of existentialism and Marxism (reflections on the social situation of literature and writer's responsibility before History) to a psychoanalysis of substances (after Brechard) and a psychoanalytical anthropology (which evidently brought Barthes to his present terms of understanding with Levi-Strauss and Lacan).
